

FRENCH GREEN PUBLIC LABEL: NOVETHIC AWARDS TWO NEW FUNDS

Paris, 28 March 2017.

AXA WF Planet Bonds

The AXA WF Planet Bonds fund has been launched end of 2015. It is mainly invested in Green Bonds. The investment approach of AXA IM is a combination of several steps: a qualitative environment assessment for each project, an ESG analysis of the issuer and, eventually, an evaluation of the financial characteristics of the bond.

Eiffel Energy Transition

Supported by the European Investment Bank (EIB), the fund Eiffel Energy Transition is dedicated to fund the green economy. In particular, it intends to fill a finance gap. The approval of long-term loans requires time and puts project developers at financial risks as the project development is highly capital-intensive. The fund provides these project developers a short term loan in order to bridge the time until he receives a long-term project funding.
